*Data Analyst with 2+ years of experience in analytics, dashboard development, statistical analysis, KPI reporting, and workflow automation. Experienced in translating complex data into actionable insights through data visualization, impact evaluation, and process automation.*

## PROFESSIONAL EXPERIENCE

**Data Analyst**, Pratham Education Foundation, New Delhi

*May 2024–Present*

- Lead end-to-end analytics for the Gurushala programme, developing KPI frameworks, dashboards, reporting systems, and workflow automation across 5+ initiatives supporting 100,000+ users.
- Deliver interactive Power BI and Looker Studio dashboards enabling programme teams and leadership to monitor KPIs and make timely decisions.
- Evaluate learning outcomes for 30,000+ students using baseline-endline, treatment-control, and regression techniques to measure programme effectiveness.
- Manage the end-to-end data preparation process by collecting, consolidating, validating, cleaning, and transforming data to support analytics, dashboards, and stakeholder reporting.
- Automate reporting, attendance processing, certificate generation, and data workflows using Python and AI-assisted scripting, reducing manual effort by 90%.
- Develop monitoring systems and operational dashboards for programmes and national competitions involving 20,000+ participants, improving execution visibility and decision support.

**Data Analyst Intern**, Meritshot

*Feb 2024–May 2024*

- Analysed datasets and developed research case studies to identify trends and support content development.

**Intern**, HP Inc. Bangalore

*Feb 2017–July 2017*

- Developed a Python automation library for printer test execution, reducing testing time by 70%.
- Automated QA testing and validated RBAC policies to improve testing accuracy and security.

## EDUCATION

**Indira Gandhi National Open University, New Delhi**

*Aug 2023*

Master of Arts (Psychology)

**Chitkara University, Punjab**

*Jul 2017*

Bachelor in Engineering (Electronics & Communication Engineering)

## TOOLS

- **Data Tools:** Microsoft Excel, Google Sheets
- **BI & Visualization:** Power BI, Looker Studio, Tableau
- **Programming:** SQL, Python
- **Analytics:** Statistical Analysis, Regression Analysis, KPI Development
